

# KINETIC

NEWSLETTER  
WINTER 2007

## Welcome to the Christmas edition of our newsletter.

Again I am pleased to report that it has been a busy couple of months for us here at Kinetic. As well as taking on and completing many more jobs in the workplace we have also taken the decision to change our company name. We will now be known as 'Kinetic Laboratories Ltd' as we feel that it better reflects the market in which we work and gives our customers a better understanding of what the company does. We have also launched our brand new website this month, please visit us at: [www.kineticlab.co.uk](http://www.kineticlab.co.uk). There are case studies to view online as well as an electronic brochure which you can download to your computer.

We hope Kinetic continue to exceed the expectation of our clients going forward in 2008.

On behalf of all of us at Kinetic Laboratories I would like to wish you a very Merry Christmas and a Happy New Year.

Seasons Greetings,

*Bill Longbone*

Bill Longbone, Managing Director

## Directors appointed

I am delighted to announce that Kinetic Laboratories have recently appointed two new directors within the company. Paul Brown, formerly Operations Manager has been appointed Operations Director and Andrew Hird, previously Projects Manager has been newly appointed as Commercial Director.

The promotion demonstrates the ongoing development of the company itself and reflects the way our business has grown over the past

four years. Paul and Andrew's input has been staggering and it was time that their hard work was recognised.

Paul and Andrew have both been with the company from the very beginning and have lots of industry experience, especially with laboratory furniture. On behalf of the team I would like to wish them a heart felt congratulations and all the best with their new positions within the company!

## Klick Technology

For the past few months Kinetic have been working alongside Klick Technology Ltd, a highly regarded company established in 1981 to provide furniture for the education sector. Klick specialise in the design and installation of science laboratories, prep rooms and food technology rooms. Together we have worked with schools across the country providing a fast and cost effective solution when manufacturing and installing laboratory equipment. We look forward to working with Klick Technology again in the near future.

## Cancer Research Update

We are delighted to announce that we have completed our work with Cancer Research UK (CRUK) with regards to the Clare Hall Laboratories, based in South Mimms, London. As one of their few preferred contractors specialising in the manufacturing and instalment of lab furniture we have recently installed a new suite of laboratories to aid the CRUK in their research.

The work was completed in early December and we would like to wish CRUK a prosperous new year with their work going forward in 2008.

## Hull University Tender Win

Kinetic Laboratories has recently won the open tender to supply a suite of laboratories for the Wolfson Building which is part of the University of Hull.

Kinetic will be working alongside Hull based building company, Robinson and Sawdon Ltd on this particular project. The project will involve installing several suites of laboratories over a six floor radius in the coming months; this is to be part of the establishments new research facility for the University. The work is due for completion in early 2008 and is Kinetic's third venture with the University this year.

## Imperial College, Hammersmith Campus

Kinetic Laboratories are thrilled to have been involved with the work which has been recently been completed at Imperial College, Hammersmith Hospital Campus. We were heavily involved with the installation of a clean room facility for the hospital which was completed at the end of November.

The cleanroom equipment installed consists of secure air locks and frameworks in stainless steel with Trespa tops to ensure an ultra clean environment. It is highly likely that radio-active products will be used in the clean room going forward so a safe and clean environment was absolutely essential in the design and installation of the equipment.

### Contact Us!

Here at Kinetic we are highly committed to our customers and strive to meet their individual needs and specifications.

We welcome the chance to talk to you and discuss your furnishing requirements so please don't hesitate to get in touch! We can even provide a free, no obligation survey quote .
